EXHIBIT INDEX

(99) Press Release issued by Kimberly-Clark Corporation on October 21, 1997 reporting earnings for the third quarter of 1997.

KIMBERLY-CLARK REPORTS THIRD QUARTER EARNINGS
Earnings Were 57 Cents Per Share in 1997 Compared to 62 Cents Per Share in 1996, Excluding Nonoperating Items

DALLAS, October 21, 1997 \_ Kimberly-Clark Corporation (NYSE: KMB) today reported third quarter 1997 net income of \$316.0 million, or 57 cents per share. The per share earnings declined 8.1 percent from earnings from operations of 62 cents per share in last year's third quarter. Reported earnings in the third quarter of 1996, including nonoperating gains, were 67 cents per share.

Sales of \$3.1 billion for the third quarter were 5.5 percent lower than in 1996; however, excluding the revenues from businesses sold during 1996 to meet the regulatory requirements of the company's merger with Scott Paper Company and from other businesses divested in 1997, sales were up approximately 1 percent. Sales for the quarter reflect an increase in worldwide sales volumes of 4 percent excluding divested businesses. The strengthening of the U.S. dollar and devaluations of certain Asian currencies negatively affected sales by approximately 3 percent and reduced earnings by approximately 2 cents per share.

Excluding divested businesses, sales of personal care products in the third quarter rose 6 percent from last year, driven by an increase in sales volumes of 10 percent. Personal care sales volumes were higher in every region, with continuing strong growth in Europe and Latin America.

Third quarter sales of tissue-based products excluding divested businesses were nearly 4 percent lower than in 1996, primarily because of changes in foreign currency exchange rates. On a worldwide basis, sales volumes and selling prices were virtually even with last year's levels. In North America, sales volumes of consumer tissue products were down about 2 percent from 1996, while sales volumes of away-from-home products increased by 9 percent. As a result of intensified competition, sales volumes of tissue-based products in Europe were down 4 percent compared to the third quarter of 1996, and selling prices averaged approximately 2 percent lower.

- more -

-2-

Third quarter operating profit of \$466.5 million was 14.5 percent lower than in 1996. The company's operating margin was 15.1 percent of sales compared to 16.7 percent in last year's third quarter. Excluding the divested businesses, operating profit for the quarter declined about 10 percent.

Wayne R. Sanders, chairman and chief executive officer, said: "Our personal care businesses continued to perform very well in the third quarter, and our strong cash flow resulted in lower interest expense. However, these improvements were not sufficient to overcome the effects of heightened competition in European tissue markets, the loss of earnings of divested businesses, adverse currency impacts and lower earnings in our away-from-home business in North America."

The decrease in third quarter operating profit was attributable mainly to the impact of competitive conditions on the company's tissue businesses in Europe and the loss of earnings of the divested businesses. Operating profit also was adversely affected by strategic changes related to the combination of Kimberly-Clark's and Scott Paper Company's away-from-home businesses in North America, which will improve the ongoing profitability of this business. These strategies are now reaching full implementation; in the third quarter, as noted above, sales volumes increased 9 percent in this business as compared to a decrease of 4 percent in the first half of the year. To date, however, the transition has resulted in higher costs and a negative impact on operating profit in the third quarter of 1997 equivalent to approximately 2 cents per share.

Interest expense for the quarter declined \$8.0 million from 1996, due primarily to a reduction in the average level of debt. However, as a result of borrowings during this year's third quarter to fund common stock repurchases, total debt was approximately \$2.4 billion at the end of the third quarter of 1997, compared to \$2.2 billion at the end of the third quarter of 1996 and \$2.3 billion at year-end 1996. The company's debt to capital ratio at the end of the third quarter of 1997 was 34.8 percent.

The company repurchased 8.9 million shares of common stock during the third quarter. Year-to-date, 14.5 million shares have been repurchased at a cost of \$724 million. The board of directors recently authorized the repurchase of an additional 20 million shares of common stock, of which the remaining authority is currently 18.9 million shares.

Kimberly-Clark's share of net income of equity companies in the third quarter was \$39.1 million in 1997 and \$38.0 million in 1996. Net income of Kimberly-Clark de Mexico, S.A. de C.V. was slightly higher, as its sales and earnings have begun to recover from the effects of adverse economic conditions in Mexico over the last two years.

For the first nine months of 1997, sales of \$9.5 billion were down 3.7 percent from \$9.8 billion last year. Excluding the sales of the divested businesses in both years, however, sales increased approximately 1 percent. Operating profit decreased 1.4 percent to \$1,505.2 million in 1997 from \$1,527.3 million in 1996, but was nearly 5 percent greater excluding the operating profit of the divested businesses. Earnings per share were \$1.88 in 1997 versus \$1.87 in 1996. Excluding extraordinary gains in 1997 and other nonoperating items in both years, earnings per share from operations were \$1.82 in 1997 compared to \$1.74 in 1996, an increase of 4.6 percent.

Commenting on the company's 1997 earnings, Mr. Sanders said, "While we have made progress toward our long-term goals in a number of areas, our overall financial performance this year is not acceptable. We incurred significant costs to implement strategic changes in our away-from-home business in North America and have not sufficiently offset the effects of heightened competition in Europe and continued low selling prices for our products elsewhere around the world. However, we are taking aggressive steps to ensure our results will improve from this point forward. Our focus on profitable growth and cost reductions in our away-from-home business is beginning to pay off, and I am encouraged by the recovery in sales and earnings at Kimberly-Clark de Mexico.

"Before the end of the year, we will finalize and announce plans for further, significant cost reductions in our worldwide operations. Our plans will be designed to increase operating efficiencies, focus on advantaged technologies and create a world-class cost and distribution structure to support our growth through the year 2000 and beyond."

A Fortune 100 company, Kimberly-Clark is celebrating its 125th anniversary in 1997. The company is a leading global manufacturer of personal care, consumer tissue and away-from-home products. The company's global brands include Huggies, Pull-Ups, Kotex, Depend, Kleenex, Scott, Kimwipes and Wypall. Other brands well-known outside the U.S. include Andrex, Scottex, Page, Popee, and Kimbies. Kimberly-Clark also is a major producer of professional health care products and premium business, correspondence and technical papers. The company has manufacturing operations in 36 countries and sells its products in more than 150 countries.

Certain matters contained in this news release concerning the business outlook, anticipated financial and operating results and contemplated transactions of the company constitute forward-looking statements and are based upon management's expectations and beliefs concerning future events impacting the company. For a description of certain factors that could cause the company's future results to differ materially from those expressed in any such forward-looking statements, see the section of Part I, Item 1 of the company's Annual Report on Form 10-K for the year ended December 31, 1996 entitled "Factors That May Affect Future Results."

### KIMBERLY-CLARK CORPORATION NOTES TO FINANCIAL SUMMARIES

- (1) Share of net income of equity companies for the nine months ended September 30, 1997 includes a net nonoperating gain of \$16.3 million, or \$.03 per share, primarily related to the sale of a portion of the tissue business of Kimberly-Clark de Mexico, S.A. de C.V. ("KCM"). The sale was required by the Mexican regulatory authorities following the 1996 merger of KCM and Scott Paper Company's ("Scott") former Mexican affiliate.
- (2) In June 1997, the Corporation sold Scott Paper Limited, a 50.1 percentowned Canadian tissue subsidiary, and in March 1997, it sold its Coosa
  Pines, Alabama, newsprint and pulp manufacturing mill, together with
  related woodlands. Also in March, the Corporation recorded impairment
  losses on the planned sales of a pulp manufacturing mill in Miranda,
  Spain; a recycled fiber facility in Oconto Falls, Wisconsin; and a tissue
  converting facility in Yucca, Arizona; and on an integrated pulp making
  facility in Everett, Washington. These transactions were aggregated and
  reported as extraordinary gains totaling \$17.5 million, or \$.03 per share,
  for the nine months ended September 30, 1997.
- (3)Other income (expense), net in 1996 includes the following gains related to sales of businesses and assets to meet regulatory requirements for the 1995 merger of Kimberly-Clark and Scott and the sale of the Corporation's remaining 20 percent interest in Midwest Express.
