ITEM 1. BUSINESS

Kimberly-Clark Corporation was incorporated in Delaware in 1928. As used in Items 1, 2 and 7 of this Form 10-K Annual Report, the term "Corporation" refers to Kimberly-Clark Corporation and its consolidated subsidiaries. In the remainder of this Form 10-K Annual Report, the terms "Kimberly-Clark" or "Corporation" refer to Kimberly-Clark Corporation.

Financial information about product classes and results, and foreign and domestic operations, and information about principal products and markets of the Corporation, contained under the caption "Management's Discussion and Analysis" and in Note 12 to the Financial Statements contained in the 1993 Annual Report to Stockholders, are incorporated in this Item 1 by reference.

Description of the Corporation. Kimberly-Clark is principally engaged in the manufacturing and marketing throughout the world of a wide range of products for personal, business and industrial uses. Most of these products are made from natural and synthetic fibers using advanced technologies in absorbency, fibers and nonwovens.

The Corporation's products and services are segmented into three classes.

Class I includes tissue products for household, commercial, institutional and industrial uses; infant, child, feminine and incontinence care products; industrial and commercial wipers; health care products; and related products. Class I products are sold under a variety of well-known brand names, including Kleenex, Huggies, Pull-Ups, Kotex, New Freedom, Lightdays, Depend, Poise, Hi-Dri, Delsey, Spenco, Kinguard and Kimwipes.

Products for home use are sold through supermarkets, mass merchandisers, drugstores, warehouse clubs, home health care stores, variety stores, department stores and other retail outlets, as well as to wholesalers. Other products in this class are sold to distributors, converters and end-users.

Pulp produced by the Corporation, including amounts sold to other companies, is included in Class I, except for pulp manufactured for newsprint and certain specialty papers which is included in Class II.

Class II includes newsprint, printing papers, premium business and correspondence papers, tobacco industry papers and products, technical papers, and related products.

Newsprint and groundwood printing papers are sold directly to newspaper publishers and commercial printers. Other papers and specialty products in this class are sold directly to users, converters, manufacturers, publishers and printers, and through paper merchants, brokers, sales agents and other resale agencies.

ITEM 1. BUSINESS (Continued)

Class III includes aircraft services, commercial air transportation and other products and services.

The Corporation owns various patents and trademarks registered domestically and in certain foreign countries. The Corporation considers the patents and trademarks which it owns and the trademarks under which it sells certain of its products, in

each instance in the aggregate, to be material to its business. Consequently, the Corporation seeks patent and trademark protection by all available means, including registration. A partial list of the Corporation's trademarks is included under the caption "Trademarks" contained in the 1993 Annual Report to Stockholders and is incorporated herein by reference.

EMPLOYEES. In its worldwide consolidated operations, the Corporation had 42,131 employees as of December 31, 1993.

RAW MATERIALS. Cellulose fibers in the form of wood pulp are the primary raw material for the Corporation's paper and tissue products and are important components in disposable diapers, training pants, feminine pads and incontinence care products. Certain specialty papers are manufactured with other cellulose fibers such as flax straw and cotton. Large amounts of secondary and recycled fibers are also consumed, primarily in tissue products. Superabsorbent materials are important components in disposable diapers, training pants and incontinence care products. Polypropylene and other synthetics are primary raw materials for manufacturing nonwoven fabrics which are used in disposable diapers, training pants, feminine pads, incontinence and health care products and industrial wipers. Most secondary fibers and all synthetics are purchased. Wood pulp and nonwood cellulose fibers are produced by the Corporation and purchased from others. The Corporation considers the supply of such raw materials to be adequate to meet the needs of its businesses.

For its worldwide consolidated operations, the Corporation's pulp mills at Coosa Pines, Alabama, and Terrace Bay, Ontario, had the capacity to supply about two-thirds of the 1993 wood pulp requirements for products other than newsprint. The Corporation's newsprint mill at Coosa Pines produces substantially all of its own pulp requirements.

The Corporation owns or controls 5.1 million acres of forestland in North America, primarily as a source of fiber for pulp production. Approximately .4 million acres are owned and 4.7 million acres, principally in Canada, are held under long-term Crown rights or leases.

Certain states have adopted laws and entered into agreements with publishers requiring newspapers sold in such states to contain specified amounts of recycled paper. The Corporation provides certain newspaper publishers with newsprint containing specified amounts of recycled paper.

COMPETITION. The Corporation competes in numerous domestic and foreign markets. The number of competitors and the Corporation's competitive positions in those markets vary. In general, in the sale of its principal products, the Corporation faces strong competition from other manufacturers, some of which are larger and more diversified than the Corporation. The Corporation has one major competitor, and several regional competitors, in its disposable diaper business and several major competitors in its household and other tissue-based products, and feminine and incontinence care products businesses.

During 1993, in the U.S., private label and economy branded competitors continued to expand distribution of their disposable training pants nationally in competition with the Corporation's training pants business, and, in the fourth quarter, a major competitor initiated regional introductions of a branded training pant. In foreign markets, the Corporation has encountered increased competition and expects to encounter significant competition in connection with its introduction of training pants and diapers in Europe. Depending on the characteristics of the market involved, the Corporation competes on the basis of product quality and performance, price, service, packaging, distribution, advertising and promotion.

RESEARCH AND DEVELOPMENT. At year-end 1993, approximately 1,200 of the Corporation's employees were engaged in research and development activities and were located in Neenah, Wisconsin; Roswell, Georgia; Coosa Pines, Alabama; Troy, Ohio; Munising, Michigan; Waco, Texas; the United Kingdom; and France. A major portion of total research and development expenditures is directed toward new or improved personal care, health care, household products, and nonwoven materials. Consolidated research and development expenditures were \$158.5 million in 1993, \$156.1 million in 1992 and \$148.8 million in 1991.

ENVIRONMENTAL MATTERS. Capital expenditures for environmental controls to meet legal requirements and otherwise relating to the protection of the environment at the Corporation's facilities in the United States are estimated to be \$54 million in 1994 and \$15 million in 1995. Such expenditures are not expected to have a material effect on the Corporation's total capital expenditures, consolidated earnings or competitive position; however, these estimates could be modified as a result of changes in the Corporation's plans, changes in legal requirements or other factors.

RISKS FOR FOREIGN OPERATIONS. The products of the Corporation and its equity companies are made in 21 countries outside the U.S. Consumer products made abroad or in the U.S. are marketed in approximately 150 countries. Because these countries are so numerous, it is not feasible to generally characterize the risks involved. Such risks vary from country to country and include such factors as tariffs, trade restrictions, changes in currency value, economic conditions and international relations.

INSURANCE. The Corporation maintains coverage consistent with industry practice for most risks that are incident to its operations.

ITEM 2. PROPERTIES

Management believes that the Corporation's production facilities are suitable for their purpose and adequate to support its businesses. The extent of utilization of individual facilities varies, but generally they operate at or near capacity. New facilities of the Corporation are under construction and others are being expanded. Principal facilities and products or groups of products made at these facilities are listed on the following pages. In addition, the principal facilities of the Corporation's equity companies and the products or groups of products made at such facilities are included on the following pages. Products described as consumer, service and/or nonwoven products include tissue products for household, commercial, institutional and industrial uses; infant, child, feminine and incontinence care products; industrial and commercial wipers; health care products; and related products.

ITEM 3. LEGAL PROCEEDINGS

The following is a brief description of material pending legal proceedings to which the Corporation or any of its subsidiaries is a party or of which any of their properties is subject:

- A. On March 11, 1993, a class action lawsuit was filed against the Corporation in the United States District Court, Middle District of Tennessee (the "Tennessee District Court"), on behalf of certain retirees who were formerly represented by the United Paperworkers International Union ("UPIU"). The Corporation's Motion to Transfer this action to the Eastern District of Wisconsin was granted.

A similar action was filed in the United States District Court, Central District of California, on behalf of retirees who were formerly represented by the Association of Western Pulp and Paper Workers ("AWPPW") at the Corporation's Fullerton, California facility. This second action was voluntarily dismissed and refiled in the Tennessee District Court on March 25, 1993. The Corporation's Motion to Transfer this action to the Central District of California was granted.

The parties to both actions have executed settlement agreements, dated March 15, 1994, providing for the voluntary dismissal of such actions, without prejudice, for a period of one year from the date that such agreements are approved by the respective courts, subject to certain conditions and circumstances allowing for the earlier refiling of such actions. On March 23, 1994, the court for the Eastern District of Wisconsin entered an order approving the settlement agreement with respect to the UPIU action. The settlement agreement with respect to the AWPPW action has been submitted to the court for the Central District of California for its consideration.

The actions relate to certain changes made by the Corporation to its retiree medical plans effective January 1, 1993. The allegations in each action are that the Corporation's retiree medical benefits were vested and could not be unilaterally amended by the Corporation, and that, therefore, the retirees are entitled to an unalterable level of medical benefits. In the event that the AWPPW settlement agreement is not approved by the court, or the actions are refiled pursuant to the terms of the settlement agreements, management has determined that under Financial Accounting Standard No. 106, and based on prevailing market interest rates, the estimated cost to the Corporation of not being able to make any amendments to its retiree medical plans with respect to the two putative classes of retirees would result in a maximum pretax charge of approximately \$5.7 million per year.

B. Since September 28, 1990, about 60 employees of contractors who allegedly worked at the Corporation's mill in Coosa Pines, Alabama at some point in their careers filed separate actions in the United States District Court for the Northern District of Texas against the Corporation and approximately 36 other companies. Most of these cases were transferred to the Federal District Court, Northern District of Alabama and subsequently have been consolidated in the Federal District Court, Eastern District of Pennsylvania where all asbestos cases pending at such time in United States Federal District Courts were consolidated. Approximately 4,713 individuals refiled three of such cases in the District Court of Orange County, Texas. The actions allege, with respect to the Corporation, that the ownership of facilities containing asbestos caused the plaintiffs to suffer physical injury. The actions seek unspecified damages. The Corporation has denied the allegations and has asserted, among other things, that the claims fail to state a claim upon which relief can be granted and that such actions are barred by applicable statutes of limitation. These actions presently are in the discovery phase.

PART I
(Continued)

ITEM 3. LEGAL PROCEEDINGS (Continued)

C. On September 28, 1992, the Corporation filed an action against Drypers Corporation, Pope & Talbot, Inc. and Pope & Talbot, Wis., Inc. in the United States District Court, Western District of Washington, alleging patent infringement with respect to the defendants' use of containment flaps in disposable diapers. In June 1993, each of the defendants filed counterclaims against the Corporation alleging that the Corporation misused its patent in violation of the federal antitrust laws. The defendants are seeking invalidation of the patent, treble damages based on the defendants' attorneys fees for defending the patent suit, and the defendants' attorney fees for prosecuting the antitrust counterclaim. The case is currently in discovery. A trial date has been set for June 7, 1994.

The Corporation also is subject to routine litigation from time to time which individually or in the aggregate is not expected to have a material adverse effect on the Corporation's business or results of operations.

Environmental Matters

- - - - -
(See the Corporation's 1993 Annual Report to Stockholders under the "Environmental Matters" section of "Management's Discussion and Analysis.")

The Corporation has been named a potentially responsible party ("PRP") under the provisions of the federal Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), or analogous state statute, at 21 waste disposal sites, none of which, in management's opinion, could have a material adverse impact on the Corporation's business or results of operations. Notwithstanding its opinion, management believes it appropriate to disclose the following recent developments concerning three of these sites where the extent of the Corporation's liability cannot yet be established:

A. The South 8th Street Landfill Site, located across the Mississippi River from Memphis, Tennessee, in Crittenden County, Arkansas, is a 30-acre site that received municipal and industrial waste from the 1950's to the early 1980's. The site is divided into three separate landfill disposal areas and an oily sludge pit area. A refining company (the "Refiner") apparently used the pit area for the disposal of waste sludge from its oil re-refining process through November 1969.

On September 9, 1992, the Environmental Protection Agency (the "EPA") identified Kimberly-Clark's Memphis mill as a PRP at the site. The mill was linked to the site by an affidavit of an employee of the Refiner which alleged that the Refiner picked up waste oil at the mill for re-refining. While Kimberly-Clark did not send hazardous wastes to the site, it did send used oil to the Refiner for reclamation.

The EPA recently conducted a Remedial Investigation and Feasibility Study with respect to the site. Based on such study, the EPA's preferred remedial alternative for the landfill area is organic treatment, stabilization and disposal in a licensed, nonhazardous landfill at a cost of \$14.8 million to \$18.1 million. The EPA's preferred remedial alternative for the oily sludge pit is natural soil cover at a cost of \$2.3 million. There are approximately 103 members, including Kimberly-Clark, of the PRP group with respect to the site. The Corporation's estimated share of total site remediation cost, if any, cannot yet be established.

- B. In August 1992, Kimberly-Clark's Spotswood, New Jersey mill received an information request from the New Jersey Department of Environmental Protection and Energy ("NJDEPE") with respect to the Jones Industrial Service Landfill. Kimberly-Clark currently has no information about the site or the status of the NJDEPE's actions to date. Kimberly-Clark does not have records indicating that the mill used the site. However, the Spotswood mill has used an industrial company for nonhazardous waste disposal services and has received routing sheets from such company which indicate that the company may have sent three loads of Spotswood mill waste to the site in September 1980. Until Kimberly-Clark receives the site information requested from the State of New Jersey, no determination regarding the extent of Kimberly-Clark's liability, if any, can be made.
- C. On February 6, 1991, the NJDEPE identified the Corporation as a PRP under the provisions of the New Jersey Spill Compensation and Control Act for remediation of the Global Sanitary Landfill waste disposal site located in Old Bridge Township, New Jersey based on the Corporation's disposal of waste at such site. The EPA has designated the disposal site as a state-led site under CERCLA with the NJDEPE acting as lead agency. In May 1991, the Corporation signed a PRP agreement and paid an administrative assessment. In August 1993, a consent decree was executed by the State of New Jersey and the PRPs, pursuant to which the Corporation agreed to pay \$575,000 for its share of Phase I cleanup costs. The Corporation's share of Phase II cleanup costs, if any, cannot yet be established.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K

(a) DOCUMENTS FILED AS PART OF THIS REPORT.

1. Financial statements:

The Consolidated Balance Sheet as of December 31, 1993 and 1992, and the related Consolidated Income Statement and Consolidated Cash Flow Statement for the years ended December 31, 1993, 1992 and 1991, and the related Notes thereto, and the Independent Auditors' Report are incorporated in Part II, Item 8 of this Form 10-K by reference to the Financial Statements contained in the 1993 Annual Report to Stockholders.

2. Financial statement schedules:

The following information is filed as part of this Form 10-K and should be read in conjunction with the consolidated financial statements in the 1993 Annual Report to Stockholders.

Independent Auditors' Report

Schedules for Kimberly-Clark Corporation and Subsidiaries:

V Property, Plant and Equipment

VI Accumulated Depreciation of Property, Plant and Equipment

VIII Valuation and Qualifying Accounts

IX Short-Term Borrowings

All other schedules have been omitted because they were not applicable or because the required information has been included in the financial statements or notes thereto.

3. Exhibits:

Exhibit No.(3)a. Restated Certificate of Incorporation of Kimberly-Clark Corporation, dated April 16, 1987, incorporated by reference to Exhibit No. 4e. of the Kimberly-Clark Corporation Form S-8 filed on February 16, 1993 (File No. 33-58402).

Exhibit No.(3)b. By-Laws of Kimberly-Clark Corporation, as amended April 22, 1993, incorporated by reference to Exhibit No.(3) of the Kimberly-Clark Corporation Form 10-Q for the quarterly period ended June 30, 1993.

Exhibit No.(10)a. Kimberly-Clark Corporation 1976 Equity Participation Plan, as amended effective May 1, 1987, incorporated by reference from the Kimberly-Clark Corporation Form 10-K for the year ended December 31, 1992.

Exhibit No.(10)b. Kimberly-Clark Corporation Management Achievement Award Program, incorporated by reference to Exhibit No. (10)b of the Kimberly-Clark Corporation Form 10-K for the year ended December 31, 1990.

Exhibit No.(10)c. Kimberly-Clark Corporation Executive Severance Plan, incorporated by reference from the Kimberly-Clark Corporation Form 10-K for the year ended December 31, 1992.

Exhibit No.(10)d. Second Amended and Restated Deferred Compensation Plan for Directors of Kimberly-Clark Corporation, incorporated by reference from the Kimberly-Clark Corporation Form 10-K for the year ended December 31, 1992.

Exhibit No.(10)e. Kimberly-Clark Corporation 1986 Equity Participation Plan, as amended effective May 1, 1987, incorporated by reference from the Kimberly-Clark Corporation Form 10-K for the year ended December 31, 1992.

Exhibit No. (10)f. Kimberly-Clark Corporation 1992 Equity Participation Plan, incorporated by reference to Exhibit No. 4A. of the Kimberly-Clark Corporation Form S-8 filed on June 26, 1992 (File No. 33-49050).

Exhibit No.(11). The net income per share of common stock computations for each of the periods included in Part II, Item 6. Selected Financial Data, of this Form 10-K are based on average common shares outstanding during each of the respective periods. The only "common stock equivalents" or other potentially dilutive securities or agreements (as defined in Accounting Principles Board Opinion No. 15) in Kimberly-Clark Corporation's capital structure during the periods presented were options outstanding under the Corporation's Equity Participation Plans.

Computations of "primary" and "fully diluted" net income per share assume the exercise of outstanding stock options under the "treasury stock method." The table below presents the amounts by which the earnings per share amounts presented in Item 6 would be reduced if the "treasury stock method" had been used.

INDEPENDENT AUDITORS' REPORT

Kimberly-Clark Corporation:

We have audited the consolidated financial statements of Kimberly-Clark Corporation as of December 31, 1993 and 1992, and for each of the three years in the period ended December 31, 1993, and have issued our report thereon dated January 28, 1994, which report includes an explanatory paragraph concerning the Corporation's changes in its methods of accounting for income taxes and postretirement benefits other than pensions to conform with Statements of Financial Accounting Standards No. 109 and No. 106, respectively; such consolidated financial statements and report are included in your 1993 Annual Report and are incorporated herein by reference. Our audits also included the consolidated financial statement schedules of Kimberly-Clark Corporation, listed in Item 14. These consolidated financial statement schedules are the responsibility of the Corporation's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly in all material respects the information set forth therein.

NOTES TO FINANCIAL STATEMENTS

NOTE 1. ACCOUNTING POLICIES

Kimberly-Clark Corporation's accounting policies conform to generally accepted accounting principles. Significant policies followed are described below.

Basis of Presentation

The consolidated financial statements include the accounts of Kimberly-Clark Corporation and all significant subsidiaries which are more than 50 percent owned and controlled. Investments in significant nonconsolidated companies which are at least 20 percent owned are stated at cost plus equity in undistributed net income. These latter companies are referred to as equity companies.

Certain reclassifications have been made to conform prior years' data to the current year presentation.

Start-Up and Preoperating Costs

 Costs of bringing certain new or expanded facilities into operation are recorded as deferred charges and amortized to income over periods of not more than five years.

Advertising and Promotion Expenses

Advertising expenses are charged to income during the year in which they are incurred. Promotion expenses are charged to income over the period of the promotional campaign.

Per Share Data

Per share data are based on the average number of common shares outstanding, which was 160.9 million, 160.4 million and 160.0 million for the years ended December 31, 1993, 1992 and 1991, respectively.

Inventories

U.S. inventories valued at cost on the Last-In, First-Out (LIFO) method for U.S. income tax purposes are valued in the same manner for accounting purposes. The balance of the U.S. inventories and inventories of consolidated operations outside the U.S. are valued at the lower of cost, using the First-In, First-Out (FIFO) method, or market.

Property and Depreciation

Property, plant and equipment are stated at cost. Depreciable property is depreciated on the straight-line or units-of-production method for accounting purposes and generally on an accelerated method for income tax purposes. When property is sold or retired, the cost of the property and the related accumulated depreciation are removed from the balance sheet and any gain or loss on the transaction is included in income.

NOTE 2. INCOME TAXES

Effective January 1, 1992, the Corporation adopted Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" (SFAS No. 109). SFAS No. 109 requires that deferred income taxes be based on the expected future tax consequences of temporary differences between the book and tax bases of assets and liabilities. Previously, deferred income taxes were determined based on the historical tax effects of timing differences between book and taxable income. The \$35.0 million cumulative effect of this accounting change was credited to 1992 income as a separate item in the consolidated income statement.

An analysis of the provision for income taxes follows:

(Millions of dollars)	Year Ended December 31		
	1993	1992	1991

Total noncurrent deferred income tax liability	\$ (585.0)	\$ (554.6)
	=====	=====

The valuation allowances for deferred income tax assets increased \$7.7 million in 1993.

The components of the provision for deferred income taxes for the year ended December 31, 1991 are as follows (in millions):

Depreciation	\$ 32.3
Disposition of a subsidiary	(11.5)

Provision for income taxes	\$284.4	39.9%	\$186.3	40.3%	\$236.1	34.5%
	=====	=====	=====	=====	=====	=====

The increase in the 1993 U.S. corporate income tax rate to 35 percent from 34 percent required that deferred income tax assets and liabilities be remeasured at the new rate.

At December 31, 1993, income taxes have not been provided on \$911 million of permanently invested unremitted net income of subsidiaries operating outside the U.S. These earnings could become subject to additional tax if they were remitted as dividends, were lent to the Corporation or a U.S. affiliate, or if the Corporation were to sell its stock in the subsidiaries. Any resulting U.S. or foreign tax liability would be largely offset by U.S. foreign tax credits.

Income before income taxes included income of \$31.2 million in 1993, a loss of \$23.5 million in 1992 and income of \$110.6 million in 1991 from subsidiaries outside the U.S.

Net operating loss carryforwards of \$270.7 million at December 31, 1993 were applicable to certain subsidiaries outside the U.S. If not utilized against taxable income, \$92.3 million of this amount will expire through the year 2000. The remaining \$178.4 million has no expiration date.

NOTE 3. POSTRETIREMENT AND OTHER BENEFITS

Pension Benefits

The Corporation and its subsidiaries in North America and the United Kingdom have defined-benefit retirement plans (the principal plans) covering substantially all of their full-time employees. Retirement benefits are based on years of service and generally on the average compensation earned in the highest five of the last 15 years of service. The funding policy is to contribute assets that, at a minimum, fully fund the accumulated benefit obligation, subject to regulatory and tax deductibility limits. Assets held in the pension trusts are comprised principally of common stocks, high-grade corporate and government bonds and various short-term investments.

Most other subsidiaries outside the U.S. have pension plans covering substantially all full-time employees. Obligations under such plans are provided for by contributing to trusts, purchasing insurance policies, or recording liabilities.

The components of net pension cost were as follows:

(Millions of dollars)	Year Ended December 31		
	1993	1992	1991
Benefits earned	\$ 56.2	\$ 51.2	\$ 44.4
Interest on projected benefit obligation ..	106.3	102.2	98.5

	-----	-----	-----
Net pension cost	\$ 50.4	\$ 51.5	\$ 37.9
	=====	=====	=====

The assumed long-term rates of return on pension assets for purposes of pension cost recognition for the principal plans were as follows:

	1993	1992	1991
	-----	-----	-----
United States plans	10.0%	10.0%	11.0%
Canadian plans	10.5%	10.5%	11.5%
United Kingdom plan	10.5%	11.0%	12.0%

Transition adjustments are being amortized to pension cost on the straight-line method over 14 to 18 years.

The funded status of the principal plans is presented below:

	-----	-----
United States plans	7.50%	8.50%
Canadian plans	8.50%	9.25%

The assumed long-term rates of compensation increases used to determine the projected benefit obligation for the principal plans were as follows:

	December 31	
	1993	1992
	-----	-----
United States plans	3.75%	4.50%
Canadian plans	4.25%	4.50%

Postretirement Health Care and Life Insurance Benefits

Substantially all retired employees of the Corporation and its North American subsidiaries are covered by unfunded health care and life insurance benefit plans. Benefits are based on years

of service and age at retirement. The plans are principally noncontributory for current retirees, but most future retirees will pay a portion of the costs. The U.S. plans place a limit on the Corporation's cost of future annual per capita retiree medical benefits at no more than 200 percent of the 1992 annual per capita cost.

Effective January 1, 1992, the Corporation adopted Statement of Financial Accounting Standards No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions" (SFAS No. 106) using the immediate transition option. Under SFAS No. 106, the costs of retiree health care and life insurance benefits are accrued over relevant employee service periods. Previously, these costs generally were charged to expense as claims were paid. The estimated accumulated postretirement benefit obligation (i.e., transition obligation) of \$395.0 million, less related deferred income tax benefits of \$150.0 million, was charged to 1992 income as a cumulative effect of the accounting change. The net charge of \$245.0 million is shown as a separate item in the consolidated income statement.

The components of postretirement health care and life insurance benefit costs were as follows:

(Millions of dollars)	Year Ended December 31	
	1993	1992
Benefits earned	\$ 6.3	\$ 6.7
Interest on accumulated postretirement benefit obligation	28.3	32.4
Amortization	(1.9)	-
	-----	-----
Net costs (of which \$24.9 million and \$24.1 million were paid in 1993 and 1992, respectively)	\$ 32.7	\$ 39.1
	=====	=====

Retiree health care and life insurance benefits paid and charged to expense were \$22.7 million in 1991.

The components of the postretirement health care and life insurance benefit obligation are presented below:

(Millions of dollars)	December 31	
	1993	1992
Accumulated postretirement benefit obligation:		
Retirees	\$243.2	\$255.1
Fully eligible active plan participants	55.0	58.2
Other active plan participants	96.6	91.5
	-----	-----
Total	394.8	404.8
Favorable actuarial experience	22.6	5.2
	-----	-----
Accrued postretirement benefit liability	\$417.4	\$410.0
	=====	=====

The current portion of the accrued postretirement benefit liability was \$27.7 million and \$34.1 million as of December 31, 1993 and 1992, respectively.

The December 31, 1993 accumulated postretirement benefit obligation was determined using an assumed health care cost trend rate of 16% in 1994, declining to zero in 2000 and thereafter, which reflects the previously described limit on

the Corporation's cost of annual per capita retiree medical benefits. The December 31, 1992 accumulated postretirement benefit obligation was determined using an assumed health care cost trend rate of 17% in 1993, declining to zero in 2000 and thereafter. Assumed discount rates of 7.5% and 8.5% were used to determine the accumulated postretirement benefit obligation at December 31, 1993 and December 31, 1992, respectively.

A one-percentage point increase in the health care cost trend rate would increase the accumulated postretirement benefit obligation by \$5.4 million at December 31, 1993 and expense by \$.5 million for the year then ended.

Other Benefits

Voluntary contributory investment plans are provided to substantially all U.S. employees. Under the plans, the Corporation matches a portion of employee contributions. Costs under the plans were \$18.0 million, \$16.4 million and \$14.9 million in 1993, 1992 and 1991, respectively.

At December 31, 1992, \$200 million of commercial paper was classified as long-term debt. In February 1993, the Corporation issued \$200 million of 7 7/8% Debentures due February 1, 2023. The proceeds were used to reduce commercial paper borrowings.

Scheduled maturities of long-term debt are \$159.6 million in 1995, \$13.9 million in 1996, \$109.2 million in 1997 and \$7.3 million in 1998.

At December 31, 1993, the Corporation had \$500 million of revolving credit facilities with a group of U.S. and European banks. These facilities, which were unused at December 31, 1993, permit borrowing at competitive interest rates and are available for general corporate purposes, including backup for commercial paper borrowings. The Corporation pays commitment fees on the unused portion but may cancel the facilities without penalty at any time prior to their expiration. Of these facilities, \$250 million expires on September 30, 1994 and the remainder expires on December 31, 1996.

	=====	=====

At December 31, 1993 and 1992, the estimated fair value of the Corporation's long-term debt was \$1,165.0 million and \$1,183.1 million compared with a carrying value of \$1,062.8 million and \$1,107.4 million, respectively. The fair value of the Corporation's commercial paper and other short-term debt approximated the carrying amount. These fair values were based on quoted market prices for the same or similar debt or on current rates offered to the Corporation for obligations with the same maturities.

NOTE 5. FOREIGN CURRENCY TRANSLATION

The income statements of foreign operations other than those in hyperinflationary economies are translated into U.S. dollars at rates of exchange in effect each month. The balance sheets of these operations are translated at period-end exchange rates, and the differences from historical exchange rates are reflected in stockholders' equity as unrealized currency translation adjustments.

Summary of unrealized currency translation adjustments:

(Millions of dollars)	1993	1992
Balance, January 1	\$ (197.9)	\$ (44.4)
Adjustments for the year:		
Australian Dollar	(1.0)	(7.8)

	(42.7)	(153.5)
	-----	-----
Balance, December 31	\$ (240.6)	\$ (197.9)
	=====	=====

The income statements and balance sheets of operations in hyperinflationary economies, i.e., Mexico prior to January 1, 1993, Brazil and Venezuela, are translated into U.S. dollars using both current and historical rates of exchange. For balance sheet accounts translated at current exchange rates,

such as cash and accounts receivable, the differences from historical exchange rates are reflected in income.

Effective December 31, 1992, the Mexican economy was determined to no longer be hyperinflationary. As a result, the Mexican peso is considered to be the functional currency of the Corporation's operations in Mexico. In conjunction with this change, \$25.3 million of deferred income taxes was charged to unrealized currency translation adjustments in 1992.

The net loss reflected in consolidated net income from the translation of balance sheet accounts of operations in hyperinflationary economies and from currency transactions was \$15.7 million in 1993, \$9.2 million in 1992 and \$6.4 million in 1991.

The Corporation and its subsidiaries periodically enter into forward contracts which hedge foreign currency exposures arising from transactions related to their businesses. At December 31, 1993, the Corporation had outstanding forward exchange contracts, maturing at various dates in 1994, to purchase \$157 million and to sell \$219 million of various foreign currencies.

Note 6. Equity Participation Plans

Equity Participation Plans adopted in 1976, 1986 and 1992 provide for awards of participation shares and stock options to key employees of the Corporation and its subsidiaries.

Upon maturity, participation share awards are paid in cash based on the increase in the book value of the Corporation's common stock during the award period. Participants do not receive dividends on the participation shares, but their accounts are credited with dividend shares payable in cash at the maturity of the award. Neither participation nor dividend shares are shares of common stock.

Data concerning participation and dividend shares follow:

	1993	1992	1991
Outstanding - Beginning of year	2,986,154	3,143,791	3,753,242

Outstanding - End of year	3,584,354	2,986,154	3,143,791

Stock options are granted at not less than market value, become exercisable over three years and expire 10 years after the date of the grant.

* Price ranges for options exercised in 1992 were \$11.88 to \$46.25 per share and in 1991 were \$7.31 to \$41.38 per share.

At December 31, 1993, the number of additional shares of common stock of the Corporation available for option and sale under the 1992 Plan or for award as participation shares at such date under the 1992 Plan was 7,322,300 shares. The 1976 and 1986 Plans have expired and no additional grants will be made under these Plans. Amounts expensed for shares under the Plans were \$10.6 million, \$5.1 million and \$12.4 million in 1993, 1992 and 1991, respectively.

NOTE 7 COMMITMENTS

Operating Lease Commitments:

Future minimum rental payments under operating leases as of December 31, 1993, were:

	=====

Consolidated rental expense under operating leases was \$100.3 million, \$118.9 million and \$106.8 million in 1993, 1992 and 1991, respectively.

Other Commitments:

The Corporation has entered into long-term contracts for the purchase of certain raw materials. Minimum purchase commitments, at current prices, are approximately \$230 million in 1994 and \$190 million in each of the years 1995 and 1996. In no year are these purchase commitments expected to exceed usage requirements.

=====	=====	=====	=====	=====	=====	=====

On June 21, 1988, the board of directors declared a distribution of one preferred share purchase right for each outstanding share of the Corporation's common stock to stockholders of record as of July 1, 1988. The rights are intended to protect the stockholders against abusive takeover tactics.

A right will entitle its holder to purchase one two-hundredth of a share of Series A Junior Participating Preferred Stock at an exercise price of \$100, but will not become exercisable until 10 days after a person or group acquires, or announces a tender offer which would result in the ownership of, 20 percent or more of the Corporation's outstanding common shares.

Under certain circumstances, a right will entitle its holder to acquire either shares of the Corporation's stock or shares of an acquiring company's common stock, in either event having a market value of twice the exercise price of the right. At any time after the acquisition by a person or group of 20 percent or more, but fewer than 50 percent, of the Corporation's common shares, the Corporation may exchange the rights, except for rights held by the acquiring person or group, in whole or in part, at a rate of one right for one share of the Corporation's common stock or for one two-hundredth of a share of Series A Junior Participating Preferred Stock.

The rights may, or after a vote of stockholders at a special meeting shall, be redeemed at \$.005 per right prior to the acquisition by a person or group of 20 percent or more of the common stock. Unless redeemed earlier, the rights expire on June 21, 1998.

The Corporation has 20 million shares of authorized preferred stock with no par value, none of which has been issued.

At December 31, 1993, unremitted net income of equity companies included in consolidated retained earnings was \$377.2 million.

NOTE 9. RESTRUCTURING CHARGE

In 1992, the Corporation announced a restructuring plan to strengthen its competitive position in consumer and service products operations in Europe and certain operations in North America. The plan included eliminating approximately 800 positions, principally in Europe; restructuring manufacturing facilities at Rouen, France, and Larkfield, England; discontinuing diaper production at mills in Fullerton, Calif., and Memphis, Tenn.; writing off the No. 2 newsprint machine at the Coosa Pines, Ala., mill; and integrating certain U.S. and Canadian consumer and service products operations.

The \$250.0 million pretax cost of the restructuring was charged to 1992 operating profit. The restructuring reduced 1992 net income by \$172.0 million, or \$1.07 per share.

Events and decisions underlying the 1992 restructuring were as follows:

- - In Europe, the Corporation's earnings had been unsatisfactory due to weak economies, high marketing expenses incurred in entering certain markets and defending against intense competition, and an inability to achieve sales goals primarily in the tissue business. In 1992, management decided to significantly reduce costs to improve its long-term cost structure, competitive position and financial performance. The cost-cutting measures included reducing the work force at mills where personnel costs were too high in relation to competition and focusing on production of fewer products at each mill to simplify the manufacturing process. The principal mills affected were in Rouen, France, and Larkfield, England.
- - In North America, partially in response to the easing of border restrictions and tariffs, management decided to integrate certain U.S. and Canadian operations to increase manufacturing efficiencies and reduce overhead costs. Due to changes in product design and improved rates of operation, certain of the Corporation's older diaper manufacturing equipment was no longer needed. As a consequence, diaper production was discontinued at mills in Fullerton, Calif., and Memphis, Tenn.
- - The No. 2 newsprint machine at the Coosa Pines, Ala., mill was shut down indefinitely in the first quarter of 1992 in response to weak newsprint markets, and severance costs were incurred. During the balance of 1992, depreciation continued to be recorded on the machine while management assessed its options. In December, management concluded that there was no profitable manner in which to use the machine in the foreseeable future, and wrote off the remaining book value of the machine.
- - Approximately \$162 million of the \$250 million restructuring charge related to asset write-offs and \$88 million related to the accrual of liabilities for severance pay and other cash obligations arising from the restructuring. During 1993, approximately \$60 million was disbursed against \$88 million of accrued liabilities established in connection with the 1992 restructuring. In 1993, as expected, the Corporation began to realize lower ongoing operating costs and improved operating cash flow from the restructured operations.

(a) Results for the third quarter 1993 include additional income tax expense of \$13.5 million (\$.08 per share) related to the increase in the U.S. statutory income tax rate to 35 percent from 34 percent as a result of legislation enacted in the

third quarter effective as of January 1, 1993.

- (b) Results for the fourth quarter 1992 include a restructuring charge of \$250.0 million pretax and \$172.0 million after-tax, or \$1.07 per share, as described in Note 9.
- (c) In 1992, the Corporation changed its method of accounting for postretirement health care and life insurance benefits and for income taxes. See Notes 2 and 3.

NOTE 12. PRODUCT CLASS AND GEOGRAPHIC DATA

For reporting purposes, the Corporation's products and services are segmented into three classes. Class I includes tissue products for household, commercial, institutional and industrial uses; infant, child, feminine and incontinence care products; industrial and commercial wipers; health care products; and related products. Class II includes newsprint, printing papers, premium business and correspondence papers, tobacco industry papers and products, technical papers, and related products. Class III includes aircraft services, commercial air transportation and other products and services.

Information concerning consolidated operations by product class and geographic area, as well as data for equity companies, is presented in the tables below and on the following pages:

(b) Income for 1991 includes a favorable adjustment of \$20.0 million related to the disposition of a subsidiary.

Intercompany sales of products between classes or geographic areas are made at market prices and are referred to as interclass sales or intergeographic items.

Assets reported by product class or geographic area represent assets which are directly used and an allocated portion of jointly used assets. These assets include receivables from other product classes or geographic areas, and are referred to as interclass assets or intergeographic items. Expense and asset amounts not associated with classes or geographic areas are referred to as unallocated items - net.

Equity companies are principally engaged in Class I operations. A listing of the Corporation's percentage ownership of the common stock of each significant subsidiary and equity company is contained elsewhere in this annual report. Kimberly-Clark de Mexico, S.A. de C.V. is partially owned by the public and its stock is publicly traded in Mexico. At December 31, 1993, the Corporation's investment in this equity company is \$264.0 million, and the estimated fair value is \$1.6 billion based on quoted market prices for publicly traded shares.

Independent Auditors' Report

Kimberly-Clark Corporation, Its Directors and Stockholders:

We have audited the accompanying consolidated balance sheet of Kimberly-Clark Corporation and Subsidiaries as of December 31, 1993 and 1992 and the related consolidated income and cash flow statements for each of the three years in the period ended December 31, 1993. These financial statements are

the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements of Kimberly-Clark Corporation and Subsidiaries present fairly, in all material respects, the financial position of the companies at December 31, 1993 and 1992, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 1993, in conformity with generally accepted accounting principles.

As discussed in Notes 2 and 3 to the consolidated financial statements, in 1992 the Corporation changed its methods of accounting for Income Taxes and Postretirement Health Care and Life Insurance Benefits to conform with Statements of Financial Accounting Standards No. 109 and 106, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Management believes that the following commentary and tables appropriately discuss and analyze the comparative results of operations and the financial condition of the Corporation for the periods covered.

1992 Restructuring and Accounting Changes

The comparability of income statement data is affected by the following items that occurred in 1992:

- - The Corporation announced a restructuring plan to strengthen its competitive position in consumer and service products operations in Europe and certain operations in North America. The plan included eliminating approximately 800 positions, principally in Europe; restructuring manufacturing facilities at Rouen, France, and Larkfield, England; discontinuing diaper production at mills in Fullerton, Calif., and Memphis, Tenn.; writing off the No. 2 newsprint machine at the Coosa Pines, Ala., mill; and integrating certain U.S. and Canadian consumer and service products operations. Additional information concerning events and decisions which gave rise to the restructuring plan is presented in Note 9 to the Financial Statements.

The \$250.0 million pretax cost of the restructuring was charged to 1992 operating profit. The restructuring charge decreased 1992 product class and geographic operating profit as follows:

(\$ Millions)			
Restructuring Charge	North America	Outside North America	Total
Class I	\$ (133.1)	\$ (83.1)	\$ (216.2)
Class II	(21.5)	-	(21.5)
Class III	(8.2)	-	(8.2)
	-----	-----	-----
	\$ (162.8)	\$ (83.1)	(245.9)
	=====	=====	
Unallocated			(4.1)

Total			\$ (250.0)
			=====

The restructuring reduced 1992 net income by \$172.0 million, or \$1.07 per share.

For the purposes of this Management's Discussion and Analysis, the 1992 restructuring charge has been segregated in the product class and geographic presentations to facilitate a meaningful discussion of ongoing operations. For a summary of the product class and geographic data including the restructuring charge, see Note 12 to the Financial Statements.

- - New required accounting rules were adopted for postretirement health care and life insurance benefits and for income taxes. These rules resulted in a one-time "catch-up" charge of \$210.0 million, or \$1.31 per share, against 1992 net income. These changes had no effect on cash flow. See Notes 2 and 3 to the Financial Statements.

Product Classes referred to in this Management's Discussion and Analysis are:

- Class I includes tissue products for household, commercial, institutional and industrial uses; infant, child, feminine and incontinence care products; industrial and commercial wipers; health care products; and related products.
- Class II includes newsprint, printing papers, premium business and correspondence papers, tobacco industry papers and products, technical papers, and related products.
- Class III includes aircraft services, commercial air transportation and other products and services.

Commentary:

Sales volumes increased 2.6 percent compared with 1992, but net sales declined because of lower selling prices and changes in currency exchange rates.

- The Corporation reduced selling prices for its Huggies disposable diapers in the U.S. in October 1992 and again in June 1993 to match diaper price reductions announced by a major competitor. These price reductions were partially offset by U.S. price and count changes in January 1993 and Canadian price increases in February 1993.
- Although sales volumes for Huggies disposable diapers were flat in North America, this product continues to be the number one selling brand in the U.S.
- Selling prices were lower for feminine care products and facial tissue in the U.S., as well as tobacco industry papers and products, principally in response to competitive business conditions.
- Sales volumes for Huggies Pull-Ups training pants increased due to the launch of the product in Canada, the United Kingdom, parts of Continental Europe, Korea and various other countries and territories. During 1993, private-label and economy-branded competitors continued to expand distribution of their disposable training pants nationally in competition with the Corporation's training pants business, and, in the fourth quarter, a major competitor initiated regional introductions of a branded training pant.
- Sales volumes increased for Depend and Poise incontinence care products and Huggies baby wipes in North America, consumer products in Asia and Latin America, Neenah Paper's premium business and correspondence papers, and Midwest Express Airlines, Inc. Sales volumes were lower for household tissue products in North America.
- Although selling prices for newsprint improved, pricing remains at depressed levels due to overcapacity and weak demand in the industry.
- Currency translation, primarily in Europe and Canada, is estimated to have reduced consolidated sales by \$147 million.

Gross profit declined in absolute terms, 6.5 percent, and as a percentage of sales.

- Selling prices were lower as previously discussed.
- Product improvement costs were higher, primarily for the new Huggies UltraTrim diapers.
- Increased start-up costs were attributable to a new European facility to support the introduction of Huggies Pull-Ups training pants and the upcoming launch of disposable diapers in the United Kingdom and parts of Continental Europe, and to a new feminine care products facility in the U.S.
- Industry overcapacity and weak prices in markets for consumer and industrial bathroom tissue contributed to continuing poor results for these businesses in North America and Continental Europe.
- Raw material costs were lower.

Excluding the 1992 restructuring charge, consolidated operating profit was \$793.1 million in 1992 compared with \$793.5 million in 1993. On this basis, operating profit was virtually unchanged but improved slightly as a percentage of sales.

- In connection with the lower selling prices, promotion expenses in North America were reduced for disposable diapers, feminine care products and facial tissue, which more than offset the decline in gross profit.
- Higher product introduction costs for expansion of Huggies Pull-Ups training pants, as well as continued heavy investment to support the upcoming launch of diapers in Europe, reduced operating profit outside North America.
- General expense in 1993 included a \$6.5 million charge related to the settlement of a class action lawsuit brought by a group of property and business owners near the Coosa Pines, Ala., pulp and newsprint mill.
- General expense in 1992 was reduced by the recovery of legal fees related to the settlement of diaper litigation.
- Currency translation is estimated to have reduced consolidated operating profit by \$6 million.

Additional Commentary:

- Excluding the previously mentioned 1992 restructuring charge and the cumulative effects of accounting changes, 1993 consolidated net income declined 1.2 percent.
- Interest expense was higher in 1993 because of higher debt levels primarily related to capital spending programs and working capital needs.
- Other income in 1993 included a \$9.4 million pretax gain from the sale of forestland in Alabama.
- Net income was adversely affected by the enactment of the 1993 Tax Act, which increased the U.S. federal income tax rate to 35 percent from 34 percent. This tax change reduced net income by \$15.5 million or \$.10 per share. Five cents related to 1993 and five cents related to deferred taxes for prior years. The effective income tax rate declined to 39.9 percent in 1993 from 40.3 percent in 1992. Significant factors affecting the comparison were lower operating losses in certain non-U.S. operations for which no income tax benefits were recognized in 1993, a lower 1993 effective state income tax rate and lower effective tax rates associated with certain other non-U.S. operations in 1993, partially offset by the U.S. tax rate increase.
- The Corporation's share of net income from equity companies grew 18.2 percent, primarily from results of operations in Mexico and Colombia, on the strength of higher sales volumes and improved selling prices. Earnings from Australia declined due to higher start-up costs and interest expense in 1993, tempered by a lower income tax rate. An insurance settlement in Australia also benefited 1992 results.
- The sale of the assets of the Corporation's Karolton Envelope business was completed in December 1993.

Neither the sale transaction, nor the operating results of Karolton, were material to the consolidated financial statements.

Adjustments:

- Adjustments to sales shown in the preceding tables consist of intercompany sales of products between product classes or geographic areas. Adjustments to operating profit consist of expenses not associated with product classes or geographic areas.

LIQUIDITY AND CAPITAL RESOURCES

(\$ Millions)	Year Ended December 31	
	1993	1992
Cash provided by operations	\$746.7	\$754.0
Capital spending	654.5	690.5
Ratio of total debt to capital (target range: 28 to 32 percent)	39.1%	39.0%
Pretax interest coverage - times	6.6	5.2

Commentary:

- The Corporation's working capital decreased \$93.1 million from December 31, 1992 to December 31, 1993. Major factors affecting the decline were:
 - a reduction in accounts receivable of \$36.4 million related, in part, to lower net sales,
 - an increase in inventories of \$56.2 million principally to support the introduction of Huggies diapers and training pants in Europe and Huggies Supreme diapers in the U.S.,
 - a decrease in dividends payable of \$65.8 million due to the timing of dividend declarations,
 - an increase in debt payable within one year of \$239.5 million primarily related to capital spending programs and working capital needs, and
 - lower accrued liabilities related to the 1992 restructuring, as discussed in Note 9 to the Financial Statements.
- In 1993, four cash dividends were paid aggregating \$273.4 million, or \$1.70 per share. In 1992, four cash dividends were paid aggregating \$262.8 million, or \$1.64 per share.
- The ratio of total debt to capital remains outside the Corporation's target range, in part as a consequence of the 1992 restructuring charge and the cumulative effects of the changes in accounting principles. Capital is the sum of total debt, minority owners' interests in subsidiaries and stockholders' equity.
- A shelf registration for \$100 million of debt securities is on file with the Securities and Exchange Commission. The filing allows flexibility to issue debt promptly if the Corporation's needs and market conditions warrant.
- In February 1993, the Corporation issued \$200 million of 7 7/8% Debentures due February 1, 2023. The

proceeds were used to reduce commercial paper borrowings. See Note 4 to the Financial Statements.

- Revolving credit facilities of \$500 million are in place for general corporate purposes and to back up commercial paper borrowings.
- The Corporation's long-term debt securities have a Double-A rating, and its commercial paper is rated in the top category.
- Management believes that the Corporation's ability to generate cash from operations and its capacity to issue short-term and long-term debt are adequate to fund working capital, capital spending and other needs in the foreseeable future.

TRENDS IN THE LAST THREE YEARS

Net Sales

- Consolidated net sales grew \$.6 billion since 1990. The increase was due to volume, partially offset by lower selling prices and changes in currency exchange rates in 1993.

Analysis of Operating Profit as a Percentage of Net Sales

	1993	1992	1991

Net sales	100.0%	100.0%	100.0%
Less:			
Cost of products sold	65.7	63.9	63.9
Marketing expense	15.3	17.7	17.7

Restructuring charge	-	3.5	-
	-----	-----	-----
Operating profit	11.4%	7.7%	10.9%
	=====	=====	=====

Excluding the 1992 restructuring charge, operating profit margins have increased during the last two years as a result of higher sales volumes, improved manufacturing efficiencies, cost control measures, lower raw material costs, and lower marketing expenses which more than offset lower selling prices in 1993. Other factors affecting operating profit margins for the last three years were:

- higher product improvement and start-up costs, particularly in 1993,

- higher than historical marketing expenses in 1992 and 1991,
- lower net price realizations for newsprint in 1992 and continuing in 1993,
- poor results for consumer and industrial bathroom tissue businesses in North America and Continental Europe in the past two years, and
- litigation settlements in 1993 and 1992.

Changes in Net Sales and Earnings versus the Preceding Year

	1993	1992
Net sales	- 1.7%	+ 4.6%
Gross profit	- 6.5	+ 4.6
Operating profit	+ 46.1	-26.8
Income before cumulative effects of accounting changes	+ 48.1	-32.1
Net income	+278.4	-73.4
Per share basis:		
Income before cumulative effects of accounting changes	+ 47.9	-32.4
Net income	+278.6	-73.6

- The decline in net sales in 1993 was a result of lower selling prices and currency translation as previously discussed. The increase in 1992 primarily was a result of higher sales volumes.
- Gross profit declined in 1993, principally because of the lower selling prices. It grew in 1992, primarily as a result of higher sales volumes.
- Excluding the effect of the 1992 restructuring charge, operating profit grew .1 percent in 1993 and 6.9 percent in 1992. Factors affecting 1993 operating profit have been discussed previously. The 1992 improvement was primarily attributable to the higher sales volumes and improved operating efficiencies at certain manufacturing facilities, partially offset by higher marketing expenses.
- Excluding the 1992 restructuring charge, income before cumulative effects of accounting changes declined 1.2 percent in 1993 and grew 1.7 percent in 1992. On a per share basis, it declined 1.2 percent in 1993 and grew 1.3 percent in 1992.
- The effective income tax rate declined to 39.9 percent in 1993 after increasing to 40.3 percent in 1992 from 34.5 percent in 1991. The higher effective income tax rates in the last two years were primarily caused by operating losses in certain non-U.S. operations for which no income tax benefits were recognized, the 1993 U.S. tax rate increase and 1991 tax effects from the disposition of a subsidiary, as discussed below.
- Spruce Falls Power and Paper Company, a former 50.5-percent-owned Canadian newsprint subsidiary, was disposed of in the fourth quarter of 1991. The transaction benefited 1991 net income by \$20.0 million, or \$.13 per share.
- Share of net income of equity companies increased in the last three years, especially at Kimberly-Clark de Mexico, S.A. de C.V., which benefited primarily from

higher sales volumes and from higher selling prices in 1993.

ENVIRONMENTAL MATTERS

During 1993, legislation was introduced in the United States Congress and certain states requiring the inclusion of secondary fiber in newsprint and certain other paper products. No such legislation was enacted that had or is expected to have a material adverse effect on the Corporation's business. It is believed that similar legislation will be introduced in 1994 in the United States Congress and certain states. The Corporation is unable to determine the effect, if any, which such legislation, if enacted, would have on its business or on its consolidated financial condition or results of operations.

The Corporation is subject to federal, state and local environmental protection laws and regulations with respect to its business operations and is operating in compliance with, or taking action aimed at ensuring compliance with, such laws and regulations. Compliance with these laws and regulations is not expected to materially affect the Corporation's business or competitive position. Management does not believe that the Corporation has been identified as a potentially responsible party at an Environmental Protection Agency-designated cleanup site which could have a material adverse impact on the Corporation's business or results of operations. Additional information concerning environmental matters is disclosed in the Corporation's annual report to the Securities and Exchange Commission on Form 10-K for the year ended December 31, 1993 under the "Business" and "Legal Proceedings" sections.

OUTLOOK - 1994

Management expects more intense competition in its disposable training pants business in 1994 due, in part, to an anticipated wider distribution of a training pants product by a major competitor in the U.S. At this time, management is unable to determine the effect of this competition on its future results of operations. Management also expects to continue to invest heavily to support the Corporation's introduction of training pants in Europe and its 1994 launch of diapers there.

Beginning in 1993, management took steps to exit businesses that do not meet its strategic objectives of building on the Corporation's core technologies, well-known trademarks and strong product franchises. The assets of the Corporation's Karolton Envelope business were sold in 1993, and the sale of the Corporation's adhesive-coated label stock business is pending. Management expects to continue to review all of its businesses to determine their ability to meet strategic objectives. Those businesses that are unable to meet these objectives may become candidates for divestiture.

DIVIDENDS AND DIVIDEND REINVESTMENT PLAN

Quarterly dividends have been paid continually since 1935.
Dividends are paid on or about the second day of January,
April, July and October. The Automatic Dividend Reinvestment
service of The First National Bank of Boston is available to
Kimberly-Clark stockholders of record. The service makes it

possible for Kimberly-Clark stockholders of record to have their dividends automatically reinvested in common stock and to make additional cash investments up to \$3,000 per quarter.

STOCK EXCHANGES

Kimberly-Clark common stock is listed on the New York, Chicago and Pacific stock exchanges. The ticker symbol is KMB.
